

The Commander Liquid Level Controller

FEATURED

THE COMMANDER is an economical UL Listed solution providing essential functions of today's liquid level controls. It combines the functions of a pressure transducer, and alternating relay, a lag pump time delay, a lead pump selector, and a 4-20mA output into one simple unit. THE COMMANDER replaces bubbler systems, float control panels, ultrasonic controls, and even expensive pressure transducer systems. The controller is available in four versions from Simplex to Quadraplex all priced at a fraction of existing technology. **Patented!**

See Page 9 to learn about the Advantages of CSI's Pressure Activated Controls!

FEATURES

- Level Measurement Range Field Selectable From 0-5 feet, 0-10 feet, 0-15 feet or 0-20 feet
- Programs in Just Seconds with Slide Switches
- Visual Level Status Display
- Output Contact Status Lights
- Includes Proprietary Non-Corrosive, Non-Metallic CSI Submersible Pressure Bell
- Includes 50' Heavy Duty, Non-Kink 1/4" O.D. x 1/8" I.D. Polyurethane Interconnect Tubing
- Controller Can Be Installed Up to 250' from the Pressure Bell (additional tubing needed)
- 4-20mA Auxiliary Output
- Low Level & Loss-of-Pressure Alarm Capability
- Plug-In Terminal Strip for Fast & Easy Installation and Service
- Available in Simplex, Duplex, Triplex and Quadraplex Models
- Easy to Retrofit Into Virtually Any Existing Liquid Level Control Application
- UL 508A Listed (E218225)

Model #	Description	List Price
CSLC-1501	Simplex Level Controller-Pressure Activated	\$1,085.00
CSLC-1502	Duplex Level Controller-Pressure Activated	\$1,085.00
CSLC-1503	Triplex Level Controller-Pressure Activated	\$1,185.00
CSLC-1504	Quadraplex Level Controller-Pressure Activated	\$1,185.00
CSLC-1501-420	Simplex Level Controller - 4-20mA Loop Activated	\$985.00
CSLC-1502-420	Duplex Level Controller - 4-20mA Loop Activated	\$985.00
CSLC-1503-420	Triplex Level Controller - 4-20mA Loop Activated	\$1,085.00
CSLC-1504-420	Quadraplex Level Controller - 4-20mA Loop Activated	\$1,085.00

Pressure Activated Controllers Include a CSI Pressure Bell & 50ft of tubing (Additional tubing Available).
Loop Activated Controllers are Control Module *Only* - (4-20MA Transducer is NOT included.)
